GROUP PROJECT GUIDELINES

PROJECT DESCRIPTION

For this group project assignment, it **MUST** be completed in a group of 4/5 members. Your group may use ITS470 / CSC570 Project but for this course, the focus is on the **DATABASE** part. You can use any programming language such as PHP, ASP, PYTHON, etc to develop your web-based system. But, you can use **ONLY ORACLE DATABASE** (any Oracle version is acceptable) as your database software. Unable to follow this, may result in a deduction of your final marks.

Scenario for the project assignment: As a consultant for the organization, your group will give suggestions and solutions for a **WEB-BASED SYSTEM** for an organization in terms of DBMS implementation. Refer to the following format for the proposal, presentation, and final report.

- **Proposal (5%)**

Content:

- Table of content
- Company background
- Problem Statement
- Objective
- Revised ERD
- Revised 3NF Relational Schema

- **Project Presentation (5%)**

Students should demonstrate:

- A functional and user-friendly database system
- Shows system complexity
- Individual ad hoc query successfully attempted
- Social Skills and Responsibilities
- Values, attitudes, and professionalism
- Communication skills, leadership, and teamwork

- **Final Report (10%)**

Content:

- Table of content

- Company background
- Problem Statement
- Objective
- Revised ERD
- Revised 3NF Relational Schema
- Entities (minimum 6) with data integrity
- Data dictionary
- Data Definition Language
- Data Manipulation Language
- Screenshots of database systems (menu, reports, forms)
- Good Presentation of the report
- 10 SQL queries in the report (question and output)/include all chapters

Good luck and have fun
